Anderson Chen

資深工程師

Taichung City, Taichung City, Taiwan

Summary

Hi, I'm Anderson. I have over 12 years of experience in SAP, mainly focusing on FI, with strong exposure to CO as well as integration with SD and MM. In my current and past roles, I've been responsible not only for system support, but also for end-to-end project delivery — including requirement analysis, solution design, development, and go-live support. I've also led SAP rollout projects for subsidiaries in Taiwan and China, and participated in enterprise-level BI system implementation. These experiences helped me build a solid understanding of both business processes and system architecture. One of my key strengths is cross-functional communication. I often work closely with different departments to align requirements and drive projects forward. I'm also comfortable working under pressure and managing multiple priorities in fast-paced environments. Of course, I'm continuously improving myself — especially in prioritization and staying focused on high-impact tasks when handling multiple requests. Looking ahead, I'd like to contribute more to digital transformation initiatives, especially by leveraging AI and automation to improve efficiency. At the same time, I'm working on strengthening my communication skills in English and Japanese, and deepening my expertise in the CO module.

Experience

華邦電子

資深工程師

August 2021 - Present (4 years 10 months)
